Example of Cage Setups

Example of Cage Setups

There are many different ways to set-up your budgie's cage. Budgies need exercise from flying so you should purchase the widest cage your budget allows. The ***minimum*** **cage size for a single budgie is 45 x 45 x 45 cm square (18 x 18 x 18 inches), but a cage 60cm wide (24 inches) is much better. If you have more than one budgie then your cage or aviary should be at least 80 - 100 cm wide. (31 - 40 inches)**

Perches and toys should be placed so that there is free space in the middle of the cage for your budgie(s) to fly from side to side.
