Finding an Avian Vet

Click here to search for an avian vet in the area. Some avian vets are not always listed so if you find an avian vet by you but not close you can call them and ask if they know of anyone closer to your area. This link can be used for all countries.

It is important that you find an avian vet before your bird (s) become sick. When birds become sick they go downhill very quickly and if you don't have an avian vet that you know of you will go into panic mode. Be prepared! It may save your birds life.
