

Budgie Mutations

Standard Requirement, for Opaline Cinnamon

Opaline Cinnamon Skyblue
Cheese Patches
Body Colour
Tail Feather

Note that the Opaline Cinnamons shall have an area between the top of the wings with no markings and with the bodycolour. This is called the V area. The wingmarkings shall be the same as the body colour. The wingmarkings are cinnamon brown. The wingmarkings are normally darker in the hens. Opaline Cinnamons has only 50% of normal body colour depth.
