

Budgie Mutations

Standard Requirement, for Opaline Cinnamon

Opaline Cinnamon Skyblue

Cheek Patches

Body Colour

Tail Feather

Note that the Opaline Cinnamon shall have an area between the top of the wings with no markings and with the body colour.
This is called the V area.
The wing ground colour shall be the same as the body colour. The wing markings are cinnamon brown. The wing markings are normally darker in the base.
Opaline Cinnamons has only 50% of normal body colour depth.
