Mineral Bars #1

MINERAL BUCKETS

Ingredients:
1/2 pint of
Powder of Paris (available at craft shops or Pharmacy)
Calcium Carbonate
Garden lime

Method:
Mix these together with enough water to make mixture similar to pouring custard (don't have it too wet). Pour into containers/moulds and add a piece of wire shaped like a U. Have about 2" protruding from the top, this is used to attach the block to something in the aviary. For moulds you can use - Plastic cups, muffin tins, empty fast food containers. Allow to dry before removing from the mould.
You can also add your own vitamins or minerals or maybe a little grit to this mix. Note - the calcium MUST be "calcium carbonate".
